## GO Fundraising

In 2011–2012, the funds raised through School Famines will be used to help feed the hungry children and their families through food security and development projects in developing countries.

[Printable Version](#)

HK\$1,500

can provide diversified drought-resistant seeds for 8 impoverished farmers

Diversified drought-resistant seeds will help farmers increase their food production and support children with long-term food security.

HK\$1,000

can provide highly nutritious corn soya blend for 8 children / pregnant women / breastfeeding mothers for 3 months

Prolonged natural disasters make countries like Ethiopia and Kenya in the East of Africa suffer from food shortages and disadvantaged groups vulnerable to malnutrition. Providing highly nutritious corn soya blend will help address their immediate need.

HK\$650

can provide nutritious food for 2 malnourished children for one year

Many families in Asia cannot afford to buy nutritious food for their children due to soaring food prices. Providing nutritious food such as eggs and peanuts will improve the health conditions of children who suffer from malnutrition effectively.
