

Can you identify the person most likely to express the values of perspectives in the below cartoon? Do you share any of their views?

1. We need to explore new technology that will help us live sustainably... such as solar and wind power.

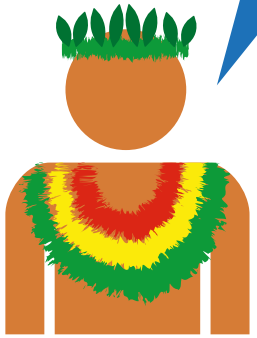

2. We've identified some Green Belt for residential use. It's a challenge to find adequate land to meet our housing supply...

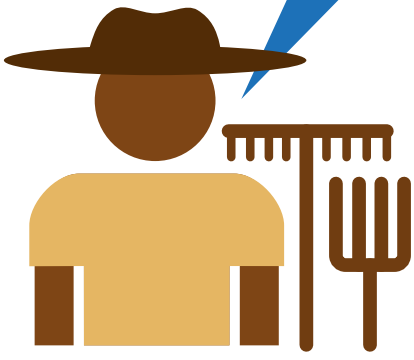

3. You can't turn HK into a huge construction site at the expense of our environment...

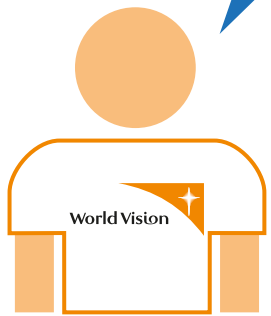

4. It isn't fair! My country hasn't contributed to climate change but we'll suffer the most. Rising sea levels mean we'll have to move to other places.

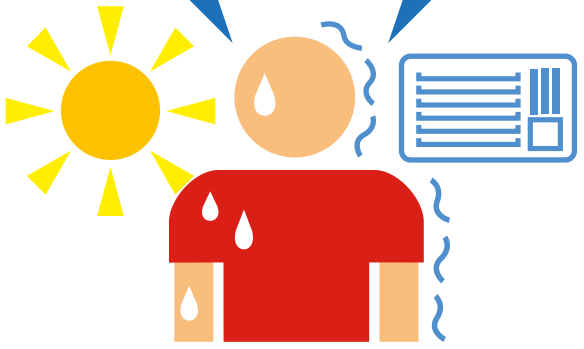

5. We don't plant our crops the way we did 20 years ago. The rain doesn't come on time and droughts are a frequent problem.

6. Climate change could undo the many years of development work we've done in developing countries...

7. It's so hot this summer! Let's turn on the A/C!
It is freezing here in the mall!

8. When the powerful typhoon hit, I saw trees falling and roofs flying. It's hard to recover especially when you are poor and hungry...

- 1. UN Scientist
- 2. Government
- 3. Green Group
- 4. Pacific Islander
- 5. A farmer from Kenya, Africa
- 6. World Vision Development Worker
- 7. Hong Kong Citizen
- 8. Survivor of Typhoon Haiyan
