

World Vision Hong Kong's **Gift Catalogue** is a list of thoughtful gifts for donors to choose and send to the children and communities in the poor countries. From a school uniform for one child, to a borehole that provides large water supply to a community, every gift would bring a lasting impact to the people in need.

In 2020, donors have sent these **"Gifts of Hope"** to children and communities in 14 countries:

For Children

These gifts equip children with the skills and tools they need to get an education and grow up healthy, safe and happy. We delivered:

Health and Nutrition

Nutritious supplements for **1,208** malnourished infants

Girls' hygiene

Menstrual hygiene kits for **688** girls

Education and Care

Early education and care for **95** children for a year

Informal education for **65** street children for a year

Scholastic items for **998** children

Bicycles for **786** children

For Families

These gifts benefit the whole family by enabling sustainable sources of income. We delivered:

Health and Nutrition

Nutritious supplements for **95** pregnant and lactating women

Treatment for tuberculosis for **264** patients

Special Support

Essential items for the cold for **329** families

Livelihood Support

Improved assorted seeds for **80** impoverished families

Sewing machine and training for **23** families

Productive tools for **8** families

Support for **20** persons to start up grocery stores

630 goats, **614** pigs, **306** cows, **6,000** chicks and ducks

For Communities

These gifts empower the communities to enable the people to thrive and become self-reliant. We delivered:

Health and Nutrition

Medications for treating malaria, pneumonia and diarrhoea for **36** health centres

Medical kits for **122** community health workers

Emergency obstetric and newborn care equipment in **10** health centres

Community Infrastructure

6 classrooms

1 latrine for a school

5 water supply and storage system

5 boreholes

Education and Care

13 reading camps (for around **35** children per camp)

Due to COVID-19 and nationwide lockdown, vocational skills training for out-of-school adolescents was suspended in 2020.

Beneficiaries of pigs were so excited about the gifts.

Pig Brings New Hope to Family in Burundi

Lydie, a 13 years old grade 6 student from Nyarunazi community in Burundi. She shares, "My parents are farmers, and have 6 children to feed. We used to have a very small harvest due to a lack of animal manure. Luckily my parents received one female pig from World Vision. This pig was a blessing to the family in many aspects. I was so happy when the pig first delivered 6 piglets. I used to help my mother to feed the piglets. This is how we have organic manure available for farming plots and the harvest is now improved."

Access to Safe Water Source in Village of Zimbabwe

After Cyclone Idai struck in March 2019, a village in Zimbabwe lost its nearest safe water source. Beulah, a villager, shares, "We had to travel more than 7km to the nearest clean water source where we would have to join a long queue just for fetching one 20L bucket of water per person. 20L of water was not sufficient for our family's daily use, so we had to use the water from the open well but that was unsafe and clean. We knew that the water from the open well was unsafe, but that was the only available water source we had."

The unprotected well used by the community as a source of water after the cyclone.

Fortunately, World Vision helped drill and construct a borehole which provides safe and clean water to the community, benefitting 400 people from 80 households. "Our spirits were rejuvenated when World Vision came to construct the new borehole for our village. Now we are happy to fetch water whenever we want in any amount we need." Beulah Tsenesa says gratefully. Moreover, they have managed to set up handwashing facilities to prevent COVID-19 and other diarrhoeal diseases because of the clean water source provided by the new borehole.
